Statement of Reasons for Allowance

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose, teach, or suggest having a suspension for use with manual and power steering applications. While the prior art discloses a strut having a coil spring and a shock absorber, and insulator for mounting an upper end of the strut to the vehicle, a steering knuckle connected to a lower end of the strut, a ball joint assembly formed at the steering knuckle, and the insulator mounting bolt eccentrically disposed relative to the center of the strut, there is no teaching of having a suspension with a connector having an insertion hole for the insertion of a ball stud of the ball joint assembly wherein a lower arm is mounted with the connector and the connector is exchangeable with another connector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
